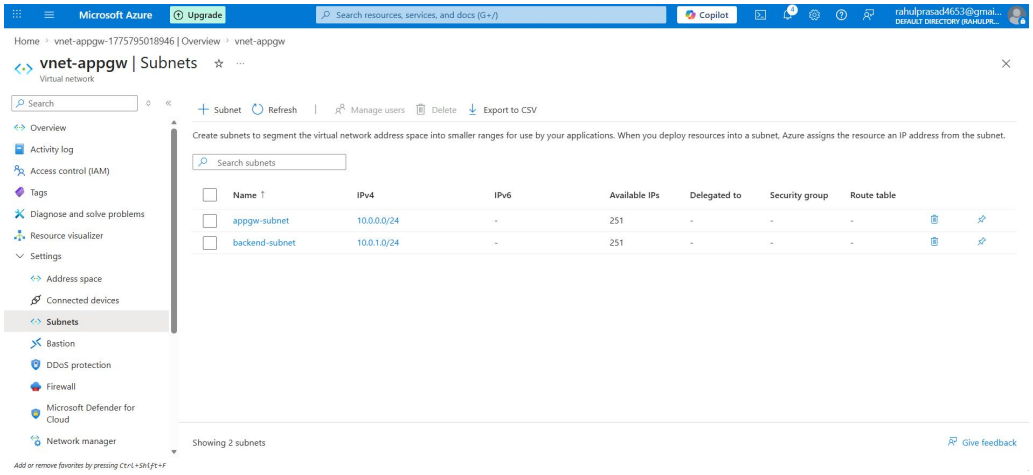
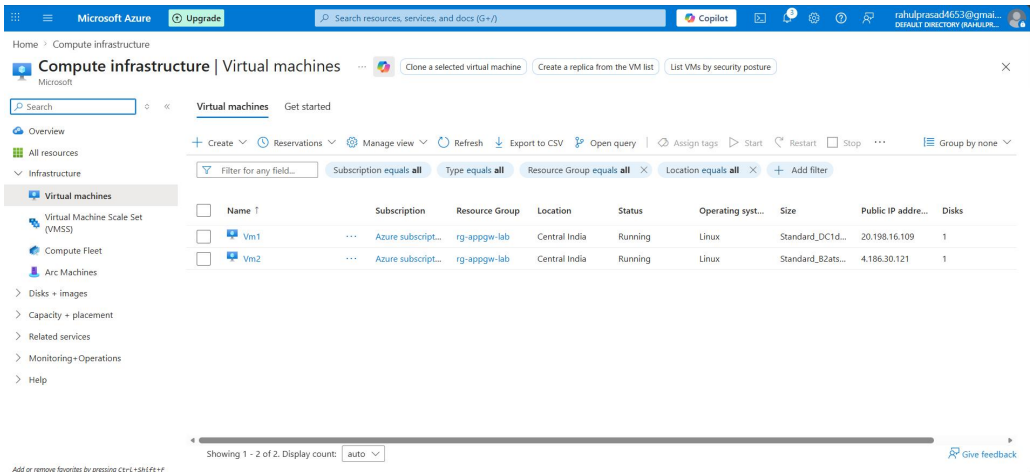
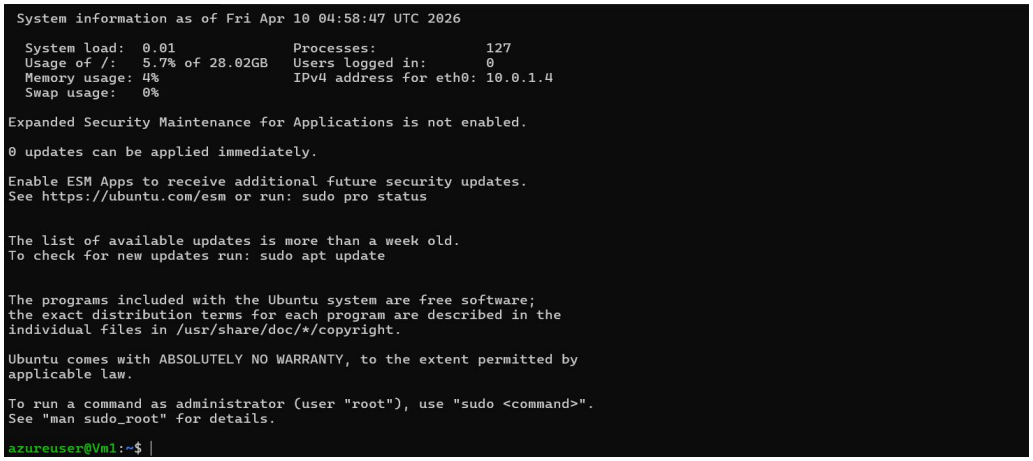
Day - 79

Step - 1: Create 2 Sub-net and 2 VM in you Resource





Step - 2: Connect Your VM using SSH



```
 System information as of Fri Apr 10 04:58:47 UTC 2026

  System load:  0.01               Processes:             127
  Usage of /:   5.7% of 28.02GB    Users logged in:       0
  Memory usage: 4%                 IPv4 address for eth0: 10.0.1.4
  Swap usage:   0%

Expanded Security Maintenance for Applications is not enabled.

0 updates can be applied immediately.

Enable ESM Apps to receive additional future security updates.
See https://ubuntu.com/esm or run: sudo pro status

The list of available updates is more than a week old.
To check for new updates run: sudo apt update

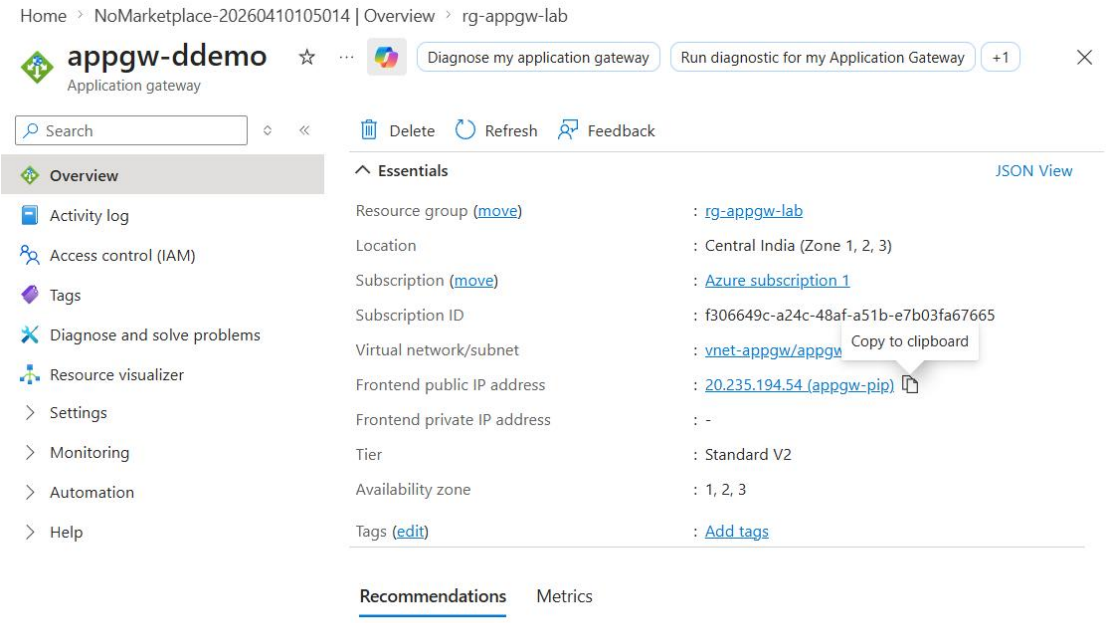
The programs included with the Ubuntu system are free software;
the exact distribution terms for each program are described in the
individual files in /usr/share/doc/*/copyright.

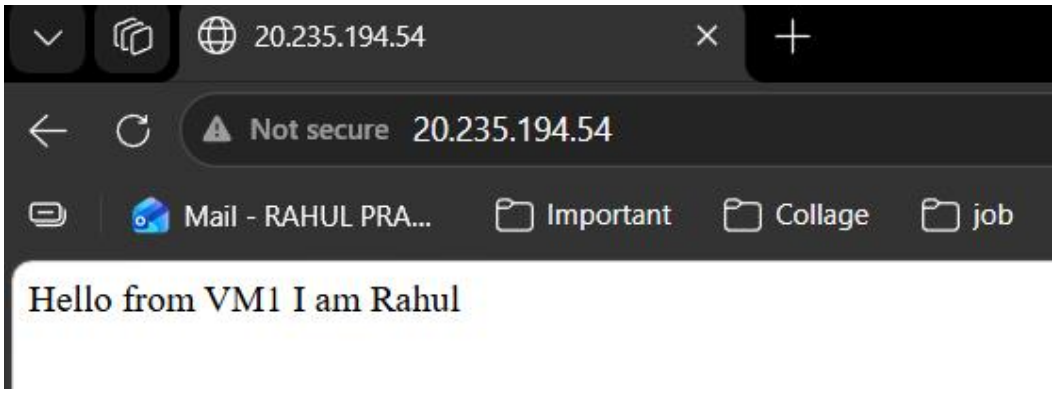
Ubuntu comes with ABSOLUTELY NO WARRANTY, to the extent permitted by
applicable law.

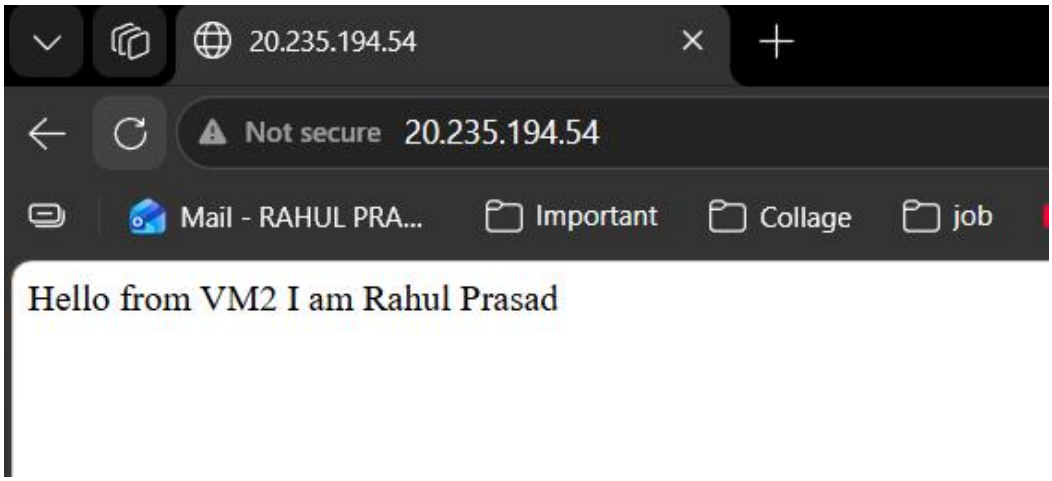
To run a command as administrator (user "root"), use "sudo <command>".
See "man sudo_root" for details.

azureuser@Vm1:~$ |
```

Step - 3: Create a Application Gateway







Step - 4: You can Access the data in HTML using same Public IP
