

Day 86

1. Creating Cosmos DB in Azure

The screenshot shows the 'Create Azure Cosmos DB Account' page in the Azure portal. The page is titled 'Create Azure Cosmos DB Account - Azure Cosmos DB for MongoDB'. It includes a navigation bar with 'Home', 'Azure Cosmos DB', 'Create an Azure Cosmos DB account', and 'Choose Architecture'. The main content area is for configuring the account. It has a 'Configure availability zone settings' section with 'Availability Zones' set to 'Disable' and 'Location' set to '(US) East US 2 EUAP'. Below this is a 'Capacity mode' section with 'Provisioned throughput' and 'Serverless' options. The 'Serverless' option is selected. At the bottom, there is a 'Version' dropdown set to '7.0'. A 'Review + create' button is at the bottom left, and a 'Next: Global distribution' button is at the bottom right.

Home > Azure Cosmos DB > Create an Azure Cosmos DB account > Choose Architecture

Create Azure Cosmos DB Account - Azure Cosmos DB for MongoDB

Configure availability zone settings for your account. You cannot change these settings once the account is created.

Availability Zones ☐ Enable ☒ Disable

Location * (US) East US 2 EUAP

Available locations are determined by your subscription's access and availability zone support (if that is enabled). If you don't see or cannot select your desired location, please open a support request for region access.
[Click here for more details on how to create a region access request](#)

Unsure of your traffic patterns? Explore Azure Cosmos DB's serverless offering if you're just starting out and skip capacity planning by only paying for the request units (RU/s) you consume. [Learn more](#)

Capacity mode ☐ Provisioned throughput
Request units per second (RU/s) are pre-configured and billed hourly, offering guaranteed throughput with two modes—**Autoscale**, which dynamically adjusts within a 1-10x range for varying workloads, and **Manual**, with fixed RU/s for steady, predictable traffic.

☒ Serverless
Ideal for intermittent or unpredictable traffic. Billed only for consumed RU/s, scaling on-demand without capacity planning or minimum charges.

2. Copying the connection string

The screenshot shows the 'New Connection' dialog in the Azure portal. It has a title bar 'New Connection' and a close button. The main content area is for managing connection settings. It includes a 'URI' field with a value 'mongodb://rp-account:*****@rp-account.mongo.cosmos.azure.com:10255/?ssl=true&replicaSet=globaldb&retrywrites=false&maxIdleTimeMS=120000&appName=@rp-account@'. There is a 'Name' field with 'SmartBank' and a 'Color' dropdown with 'No Color'. A 'Favorite this connection' checkbox is checked. Below this is an 'Advanced Connection Options' section. At the bottom, there are 'Cancel', 'Save', 'Connect', and 'Save & Connect' buttons. There are also two informational boxes on the right: 'How do I find my connection string in Atlas?' and 'How do I format my connection string?'. Both boxes have a 'See example' link.

New Connection

Manage your connection settings

URI Edit Connection String

mongodb://rp-account:*****@rp-account.mongo.cosmos.azure.com:10255/?ssl=true&replicaSet=globaldb&retrywrites=false&maxIdleTimeMS=120000&appName=@rp-account@

Name SmartBank

Color No Color

☒ Favorite this connection
Favoriting a connection will pin it to the top of your list of connections

[Advanced Connection Options](#)

[How do I find my connection string in Atlas?](#)
If you have an Atlas cluster, go to the Cluster view. Click the 'Connect' button for the cluster to which you wish to connect.

[Cancel](#) [Save](#) [Connect](#) [Save & Connect](#)

3. Opening the Compass and Adding a connection using this Connection String.

The screenshot shows the MongoDB Compass 'Insert Document' dialog. The dialog is titled 'Insert Document' and has a close button. It shows the collection 'smartBank.FeedBack'. The main content area is a text editor with a JSON document:

```
{
  "_id": {
    "$oid": "69e6ff4904f573c22b5e7093"
  },
  "feedback": 5,
  "Comment": "Very good service"
}
```

. At the bottom, there are 'Cancel' and 'Insert' buttons.

Insert Document

To collection smartBank.FeedBack

VIEW
